ABOUT ME

Passionate final CSE student at Jain Global Campus, Bengaluru, skilled in full stack web development. Excited to create user friendly and scalable applications and collaborate on impactful projects. Experience of building Full Stack Web applications with JavaScript, TypeScript, Reactjs, Next js , Nodejs, Express, Hono and some other cool libraries and frameworks.

TECHNICAL SKILLS

Languages: JavaScript, Typescript, python
Frontend: Tailwind, Shadcn, React, NextJs
Backend: NodeJS, Express JS, NextJs, Hono
Database: MongoDB, PostgreSQL, Prisma ORM
Other Technologies: Docker, Swagger, Bash, Git, llms, ai-sdk, Turborepo

EXPERIENCE

Full Stack Web Developer   Mar 2025 – May 2025
theSchoolReview   *Bengaluru, India (REMOTE)*

- Designed and developed the entire website for theSchoolReview from scratch using Next.js, TypeScript, and Tailwind CSS, resulting in a fully responsive, performant platform.
- Built a seamless authentication system and integrated Google Maps API for location-based school discovery features.
- Implemented a web scraping module to gather structured school data efficiently, enhancing data richness and accuracy.
- Deployed the application with CI/CD pipelines and optimized both frontend and backend for performance and scalability.
- Improved frontend performance,improved SEO to A+ by following some best practices, boosting Lighthouse scores by 25% soon after launching the producct, and enhanced accessibility to meet WCAG 2.1 standards, ensuring inclusivity.

PROJECTS

Shrinklyy-t3 | Nextjs   2024

- Shrinklyy is a URL shortening service built with the T3 stack, designed to make long URLs shorter and more manageable.

TLDR AI | Nextjs   2023

- A Chrome extension that uses the Gemini AI API to generate concise summaries of web pages. Built with React, TypeScript, and Tailwind CSS and webpack as a bundler.

chat-with-image | Nextjs   2025

- It takes image as an input and lets you to interact with it. It uses google gemini api.
